# OPEN DAY & SCHOOL TOURS FOR FOUNDATION 2019

## Belgrave South Primary School has been providing excellence in teaching and learning for over 100 years.

Located in the Dandenong Ranges, the school provides well equipped grounds and buildings in a beautiful setting. We are an integral part of the local community and we highly value the support of our parents and community members in our school each day. We work together to facilitate excellent learning opportunities, provide state of the art technology and develop innovative learning spaces. Our Science and Inquiry Learning Centre and Maker Space supports the development of critical and creative thinking. We encourage high achievement and our students achieve excellent results.

Beginning primary school is an exciting time. The right start to school helps children build positive relationships and to develop a strong sense of identity and belonging, both of which are important to their long-term development, learning and wellbeing.

We have strong links with local pre-schools and offer an extensive transition program that commences in July for enrolled students. We offer before and after school care, holiday care and an extensive program of extra-curricular activities.

Our Foundation Transition Program helps your child to become familiar with our school through specialist learning activities and play based sessions. Children will be well supported by their new teachers as they build their confidence and increase their readiness to start school. It is incredibly rewarding for both parents and teachers to watch our children grow socially, emotionally and academically during the program and throughout their early years at Belgrave South Primary School.

The program also gives us the opportunity to welcome and involve parents in our Belgrave South Primary School community. We run sessions especially for parents to explore what the early years of school involve and how we can work together to ensure that students make the best start to school.

Our school tours give you the opportunity to see learning in action and meet our junior school teaching team. You can see the broad range of learning programs and the many opportunities that are available to our students in Literacy, Numeracy, Science, Digital Technology/Multimedia, Creative Arts, Physical Education, Japanese, Environmental Education, Hospitality (Plot to Plate Program) and Student Leadership.

We are proud of our school and look forward to meeting you for a school tour.
